

Log Work Orders, Assign Responsibility & Complete Maintenance Checklists with Gensuite Maintenance Manager

Steamline asset tracking & maintenance using Gensuite Maintenance Manager. Seamlessly assign, track and execute equipment/asset maintenance work orders, together with Mobile-ready maintenance inspection checklists.

Integrate Gensuite Maintenance Manager with ERP systems and IT systems for asset inventory and other key business functions/operations; and with Gensuite's EHS application modules to stay on top of safety/permit-critical equipment maintenance requirements.

DISCOVER WHAT MAINTENANCE MANAGER CAN DO FOR YOU

Maintenance Made Easy

- ▶ Develop a comprehensive list of safety-critical devices (i.e. eye wash stations, fire extinguishers, cranes, hoists) and/or equipment (i.e. lathes, drilling machine, etc.)
- ▶ Schedule ad-hoc or recurring maintenance tasks by equipment, department, or location
- ▶ Manage work order requests to ensure workload balance for maintenance technicians
- ▶ View site status summary for systematic problems through work order trends & reports
- ▶ Auto-generate email notifications to indicate status of actions for the responsible person, site and business level
- ▶ Create flexible, point-of-action checklists for operational tasks
- ▶ Simple interface for both Desktop and Mobile use with barcode and QR code scanning!

Manage Work Orders & Maintenance Checklists More Efficiently with Gensuite!

Work smarter – not harder. Gensuite Maintenance Manager is a proven tool to help users ensure equipment is in working order, so you can continue operations as normal.
