

Comprehensive & Sustainable Answer to Product Compliance

Gensuite Product Steward

Product regulatory compliance obligations (REACH, RoHS, Prop 65) and demands for product information from customers continue to proliferate globally. Organizations continue to address these obligations with limited internal resources across multiple functional groups and inadequate IT systems.

Gensuite Product Steward offers an integrated, turnkey software solution to address your current and emerging product compliance priorities and needs. Using this fully customizable platform, you can centralize and automate upstream supplier and manufacturer engagement and data collection to establish smarter and more environmentally sound product design and production activities.

DISCOVER WHAT PRODUCT STEWARD CAN DO FOR YOU

Advance More Sustainable Practices throughout Your Supply Chain

- ▶ Centralize and coordinate cross-functional teams via a single digital tool
- ▶ Streamline supplier engagement through Gensuite's best-in-class, web-based Supplier Portal, leveraging industry standard reporting templates and flexibility to build custom questionnaires
- ▶ Address Product Compliance (REACH, RoHS, Prop 65), Conflict Minerals, and more through a single platform
- ▶ Facilitate cross-functional collaboration and coordination with integrated workflows and alerts to shareholders
- ▶ Integrate business ERPs (e.g., SAP, JDE) for automatic inclusion of new parts/materials and new suppliers into supplier campaigns and compliance due diligence activities
- ▶ Integrate product design/engineering (PLMs) and order fulfillment systems for automatic sharing of product/material compliance flags and insights
- ▶ Turnkey, fully-integrated Supplier Engagement Services provided by our global team

Address It All – via a Single, Integrated Solution & Service with **Gensuite Product Steward!**

Key Challenges to Product Sustainability Program Management

- ▶ Proliferation of new regulations with impact on product
- ▶ Management of Change, including organizational, new products and new suppliers
- ▶ Cross-functional team coordination across Quality, Sourcing, EH&S, Engineering, Sales and more
- ▶ Supply chain complexities
- ▶ Inadequate, disconnected IT systems (ERP, PLM, Sales, Fulfillment)
- ▶ Customer demands for information

"We use spreadsheets to manage and track product compliance status for several regulations and customer requests. We need a more sustainable option."

"We need help managing change more effectively with integrated workflows and integration with our ERP system (e.g., SAP, Oracle) to address new suppliers and new products in real-time."

Sound Familiar?

Gensuite addresses all of the above with its integrated, turnkey software solution and full services capability, tailored to your current and emerging Product Compliance priorities and needs.

An initiative of the EICC and GeSI

Together, in partnership with CFSI – the Conflict Free Sourcing Initiative – Gensuite aims to help subscribers advance responsible sourcing of raw materials in supply chains.
