

# SAFETY PROGRAMS & PROCEDURES

## Why Gensuite for Safety Programs & Procedures

Reduce safety risks and incidents with Gensuite's safety management system. Gensuite Safety Programs & Procedures software offers an integrated approach to safety management processes including those for managing industrial hygiene and ergonomic risks, issuance of work permits for high risk operations and development of Lockout Tagout (LOTO) procedures.

### Key Capabilities

- ① Inventory all routine/non-routine tasks and associated hazards
- ① Author risk assessments using standard and/or custom scoring models, and track comments/revisions via approval workflow
- ① Develop operation and risk-focused safe work permits (e.g., Hot Work, Confined Space Entry, High Voltage Testing)
- ① Communicate risk assessments and safe work permits to employees and ensure associated safety training via Gensuite Training Compliance suite
- ① Develop and publish equipment-specific or process-specific LOTO procedures, maintain records of authorized LOTO personnel and track execution status
- ① Centralize and standardize the location of safety information for easy access by all employees and (as appropriate) contractors and contingent workers

### Business Case Study

#### Business Profile

Aircraft system manufacturer and services provider with 2,000+ employees and greater than 10,000 confined spaces on site

#### Business Need

Centralized web-based system for safe work permits with the capability to maintain inventories of permit-required confined spaces and associated training requirements

#### Gensuite Solution

Gensuite Safe Work Permit Application to:

- ① Access online confined space permit that references associated hazards and other assessments
- ① Automate alerts of training and permit considerations
- ① Integrate safety-critical equipment inventory

# SAFETY PROGRAMS & PROCEDURES

## INTEGRATED SUITE OF APPS

---

### SAFETY MATRIX / RISK REGISTRY

Prioritize the development of assessments for job activities relating to safety risks, industrial hygiene and ergonomics based on a matrix ranking system

### LOCKOUT TAGOUT

Create and maintain a repository of LOTO procedures that is accessible for employees to search and view; track LOTO execution

### SAFETY RISK ANALYSIS / JOB SAFETY ANALYSIS

Develop and maintain a searchable repository of job-based risk assessments, available for easy search and access by all employees

### ERGO FACILITATOR

Standardize ergonomic assessments and projects with office and industrial settings using corrective action tracking

### SAFE WORK PERMITS

Create digital permit requests, review requests, approve requests, standardize work permits to ensure consistent client/contractor requirements for High Risk Operations, and execute next-steps for safety-critical findings related to contractor projects

### CONTRACTOR SAFETY

Manage and streamline qualified contractor firms through a centralized repository; track active onsite contractor projects, firm safety performance and contractor firm employee records

### INDUSTRIAL HYGIENE

Track and analyze Industrial Hygiene (IH) exposure assessments and monitoring summaries, and leverage automated occupational/personal exposure limit

---

## Key Features

- ⦿ Excel template for batch uploading & quick status summaries at a glance
- ⦿ Search and view procedures via Mobile
