

SECURITY PROGRAM MANAGEMENT

Why Gensuite for Security Program Management

Gensuite Security Program Management software incorporates key elements of corporate security plans. Conduct risk assessments, review risk profiles, and engage with employees and security professionals in reporting and follow-up processes.

Key Capabilities

- ① Compile information with key details about site location, security/emergency plans and emergency contact information
- ① Establish custom risk profiling model with a scoring system within your organization for understanding potential security risks
- ① Schedule security drills and other operational tasks with automatic reminders
- ① Capture security concerns from all employees and alert the security team of potential incidents with the ability to escalate a security incident
- ① Document security incidents including incident follow-up and closure with document attachment capability (e.g. police report, pictures, investigation documentation)
- ① Leverage integrated reporting tools for analysis and identifying incident trends
- ① Conduct audits of the security management program to assess potential program gaps and identify corrective actions

Business Case Study

Business Profile

Equipment manufacturer and services provider with global facility and global customer footprint

Business Need

Organization-wide security and crisis management program for reporting and investigating potential concerns, including corrective action tracking and global / regional reporting

Gensuite Solution

Gensuite Security Concern, Security Incident Reporting, Action Tracking System, Compliance Calendar and Profiler with:

- ① Automatic email notifications to security professionals
- ① Streamlined visibility to concerns and incidents with quick follow-up
- ① Facility risk-scoring based on each facility's responses to a customized security/crisis management risk survey with drilldown reporting

SECURITY PROGRAM MANAGEMENT

INTEGRATED SUITE OF APPS

SECURITY CONCERN REPORTING

Log and track security concerns with automatic email notifications to designated security leaders with escalation options for an actual security incident

COMPLIANCE CALENDAR

Schedule periodic/recurring tasks and obligations, assign responsibility with email notifications and intelligent escalations and track and report status

SECURITY INCIDENT REPORTING

Record incident details by type, track follow-up with automatic email notifications and report incidents and trends

SECURITY AUDITOR

Conduct audits using internally authored protocols or turnkey global content providers; export findings to the Gensuite Action Tracking System

ACTION TRACKING SYSTEM

Manage corrective action plans, assignments, notifications and escalations, with real-time status/ closure tracking of trends and data mining

PROFILER

Track site profile details and custom attributes of security risks and programs, assign responsibility and update frequency and manage real-time reports by scope and criteria

Key Features

- ⦿ Quickly escalate a security concern report to a security incident
- ⦿ Real-time charts with ability to chart by incident type and incident status
- ⦿ Real-time compliance task management via mobile with QR capabilities
