

# CONTRACTOR MANAGEMENT

## Why Gensuite for Contractor Management

Gensuite Contractor Management Software standardizes the management of workplace safety for contractors. Conform to contractor qualification requirements, enhance contractor safety with analytics, reduce the potential for contractor-related incidents and improve collaboration with real-time feedback and performance metrics.

### Key Capabilities

- ⦿ Quickly assign active projects from list of qualified contractors
- ⦿ Manage contractor firms' risks and safety programs
- ⦿ Record contractor firm employee training and integrate with onsite security for contractor firm badges
- ⦿ Measure performance through online dashboards and provide real-time feedback
- ⦿ Establish and drive leading indicators such as safety observations, Near Miss reporting and stop work actions

### Business Case Study

#### Business Profile

Construction management and services provider with global facilities and large customer footprint

#### Business Need

Integrated platform for conforming to contractor firm pre-qualification processes, collecting contractor firm details, visibility to firms that are approved to conduct work enterprise-wide, and monitor contractor performance onsite

#### Gensuite Solution

Gensuite Contractor Safety application, with auto-links to existing Gensuite applications such as Incidents & Measurements and Inspection Tool for:

- ⦿ Integrated global qualification process and automated notifications for requalification/disqualification based on risk of associated project activities
- ⦿ Standardized contractor performance reporting for both leading indicators (e.g., routine safety inspections) and lagging indicators (contractor Injury & Illness rate based on their project-related man-hours)

# CONTRACTOR MANAGEMENT

## INTEGRATED SUITE OF APPS

### CONTRACTOR SAFETY

Manage and streamline qualified contractor firms through a centralized repository; track active onsite contractor projects, firm safety performance and contractor firm employee records

### INCIDENTS & MEASUREMENTS

Input and manage contractor firm project incidents and track events related to contractor firm projects

### SAFE WORK PERMITS

Create digital permit requests, review requests, approve requests, standardize work permits to ensure consistent client/contractor requirements for High Risk Operations and execute next steps for safety-critical findings related to contractor projects

### INSPECTION TOOL

Monitor contractor firm safety through assignment of inspection checklists with real-time tracking of action items and complete inspections directly from a Mobile device

### SAFETY OBSERVATIONS

Enable tracking of behavior-based safety (BBS) observations using defined risk categories and associated behaviors or conditions for safe versus at-risk activities that are specific to a contractor's involvements within assigned projects

### INITIAL INJURY REPORTS

Log work-related injuries/illness cases for contractor firm projects and track the investigations/follow-up details

### SURVEY ENGINE

Create and manage contractor qualification forms/surveys with the flexibility to use across the business and contractors easily

## Key Features

- ⦿ Real-time recording of visual safety observations and other leading indicators
- ⦿ Real-time firm dashboard of business analytics
- ⦿ Log contractor-related action items and track closure
