

# ENVIRONMENTAL REMEDiation

## Why Gensuite for Environmental Remediation

Gensuite Environmental Remediation Software helps you manage environmental clean-up and restoration efforts. Manage remediation projects by centralizing project-critical data and tasks in a suite of easy-to-access applications that support project teams.

### Key Capabilities

- ④ Manage remediation projects with critical information such as: site location tracking, contacts, regulatory agency requirements, monitoring data, and financial assurance information
- ④ Standardize compliance requirements through detailed task assignments and reports
- ④ Engage all team members in remediation project management including company leadership, project managers, laboratories and contractors
- ④ Provide standardized reporting as required by government authorities and as requested by other external stakeholders such as local communities

### Business Case Study

#### Business Profile

Former manufacturing facility with government order for remediation activities, including auditing and ongoing sampling requirements

#### Business Need

Consolidated interface for tracking project details, identifying actionable regulatory requirements, and notifications to ensure critical tasks and reports are completed on time; detailed reports to assist with measuring ongoing project performance and compliance

#### Gensuite Solution

Gensuite Permit Manager, Compliance Calendar, Profiler and Water Watch for:

- ④ Project details and financial data; with actionable requirements defined within Permit Manager

# ENVIRONMENTAL REMEDIATION

## INTEGRATED SUITE OF APPS

### COMPLIANCE CALENDAR

Schedule periodic/recurring tasks and obligations, assign responsibility with email notifications, and track escalations and report status

### PROFILER

Track facility operating profile details and custom attributes, assign responsibility and update frequency and generate real-time attributes reports by organizational scope and criteria

### WATER WATCH

Schedule and log ongoing wastewater parameter data, compare with permit limits, and assess performance with advanced statistical process control SPC charting and analytics

### PERMIT MANAGER

Digitize key permit/consent-related details and monitoring requirements, and centralize all permit/regulatory documentation

### WASTE TRACKER

Flexible solution to manage and report waste from generation, to accumulation, through disposal; application comes integrated with Mobile QR code scanning to manage all waste activities onsite

## Key Features

- ◉ Manage recurring obligations and schedules across project sites
- ◉ Integrated dashboards for compliance activities
- ◉ Consolidated dashboard for all remediation projects and associated regulatory requirements and reports
- ◉ Management of Third-Party remediation contractors and laboratories
