Reg Tracker Custom

Any industry

Custom scope per subscriber

Monthly updates

Unlimited

Variable based on content + one-time setup and activation

Reg Tracker READY is Right for You if You...

- ▶ Generate hazardous waste, including used oils from maintenance activities, solid or recyclable wastes
- ▶ Operate a machine or wood shop to support maintenance activities
- ▶ Operate fuel-fired boilers, emergency generators or other stationary combustion engines
- ▶ Operate an air emissions source potentially subject to a state general permit or source registration program
- ▶ Utilize above ground or underground storage tanks for hazardous materials, oil or waste materials
- ▶ Have onsite gasoline dispensing facilities that are used only for company vehicles
- ▶ Pre-treat process wastewater
- ▶ Operate / maintain cooling towers, industrial chilling systems, HVAC systems, air compressors, air handling systems, or similar equipment
- ▶ Handle, offer or prepare hazardous materials for shipment
- ▶ Are subject to Federal SPCC Planning requirements, but not subject to OPA 90 Facility Response Programs

Monthly Regulatory Tracking Specific to:

- ▶ Hazardous waste generator requirements, excluding storage, transportation or disposal facilities (RCRA Part B, CA Tiered Permitting)
- ▶ Wastewater and storm water discharge permitting requirements, excluding domestic wastewater discharge and / or treatment and onsite sewage disposal
- ▶ Process wastewater treatment are limited to those related to pH adjustment and solids settling / filtration operations
- ▶ Review of air emissions control program requirements limited to those applicable to non-specific industry sources (internal combustion engines, emergency generators, industrial boilers, VOC storage tanks etc.)
- ▶ General program standards and state adoption status for federal NSPS and NESHAP / MACT programs tracked and reported
